HELISET

Manual tool measuring device for
the measuring of grinding wheels and tools

Key parameters

Comfortable measurement of grinding wheels, reduction of down times. With HELISET you are now able to measure your grinding wheels easily, fast and precisely. While the production of tools is running the next grinding wheel can already be prepared offline. It is your benefit.

Measuring made easy – The ideal approach to tool measurement

- New design
- Optimized hardware
- New software
- Modular platform

WALTER offers an easy approach to tool measurement. With HELISET we offer you a compact measuring device featuring WALTER precision which enables you to measure your grinding wheels. Unbeatable price performance ratio guaranteed.

Advantages

- Fast manual measurements of grinding wheels and tools
- No programming required
- Low training requirement
- Single-handed quick adjustment
- Manual fine adjustment
- All wheel shapes can be selected and measured via drop down menu
- Intuitive user interface
- 22" color monitor

Technical data

- Diameter up to 350 mm
- Length up to 400 mm
- Snap gauge principle up to 100 mm
- Manual axis movement
- ISO 50 spindle
- 45 x magnification

Highlights

- Digital camera with telecentric lens
- Numerous standard modules for all important measuring tasks
- Optional data transfer to the machine control
- Cutting edge inspection
- Integrated storage space for grinding wheel sets, tools and adapters
